

Sprint 2 Report
Ethereum Microtransactions
2x2
11/05/2017

Actions to stop doing:

- Bringing sparse weekly reports for our weekly meetings with Ali.
- Stop focusing on tutorials and start actually coding our implementations.

Actions to start doing:

- Having more group coding sessions.
- We should start updating our Trello board more.
- Start committing tasks for each team member.gut
- Splitting into smaller focus groups.
- Need to start making sure and nailing down our user stories more.

Actions to keep doing:

- Independent research to better understand our project
- Weekly meetings with Ali to keep each other up to date on what is happening
- Our weekly SCRUM meetings with us alone without Ali
- Passing each other links on what we thought were good reads to better help us research

Work completed/not completed:

- Due to some changes with our customer(Ali) our sprint 2 stories have changed, therefore as of right now we are still in progress with everything.
- However, our research with ethereum and block chains are going well.

Work completion rate:

- 60% completion rate. Could have been more however due to changes within our user stories we have fallen behind.
