

Sprint 4 Report
Ethereum Energy Exchange
2x2
12/03/2017

Actions to stop doing

- Stop working with python
- We are no longer trying to integrate this into the SEADS++ hardware due to time constraints so we had to move our focus back to the block chain.

Actions to start doing:

- Keep our trello board updated so we know that we are all on the same page.
- Keep test cases updated
- Keep integrating together so that we avoid merge conflicts.
- Working together as a group more so that we can combine our parts of the project.

Actions to keep doing:

- Bringing good/detailed weekly reports to Ali
- Weekly meetings with Ali to keep each other up to date on what is happening
- Our weekly SCRUM meetings with us alone without Ali

Work completed:

- Wrote a smart contract to be deployed to our dapp
- Created a dapp network

Work not completed:

- Did not implement DAPP into SEADS hardware

Work completion rate:

- 85% completion rate. We need to connect our block chain to our SEAD device.
